

## Pipeline Construction Mats

**JUTEC®-Item number:  
RM0403PL-AL**

*These mats slow down the cooling process of the weld seams of pipelines. They prevent the pipelines from shock cooling and protect the knit line from moisture immediately after the welding process.*

*The mat made of glass fabric with a aluminium sheet foil and provides heat protection up to 180°C.*

- Fasteners made with leather buckles
- Other Material: silicate fabric for heat protection up to 1200°C
- Measurements: 300 x 400 mm,  
other measurements up to an average width of 3000 mm on request
